

Leif Blair Transport Mangere

Bypass filtration snapshot

- 22 Kenworth trucks fitted with Astrea bypass filtration.
- Engines are predominantly Caterpillar and Cummins.
- Oil was being serviced every 20,000kms however oil is now changed at 80,000kms in conjunction with Astrea filtration.
- This is a 75% reduction in oil use.
- No oil related issues for 7 years.
- Sampling has identified engine issues that were able to be fixed before they presented as a breakdown.

"The Astrea system has been an easy fit for our fleet. It has helped reduce the time our trucks are off the road for servicing and we are purchasing far less oil as a result. The technical support from the team at Astrea has helped our workshop to identify and fix issues that we didn't know existed and we are seeing less down time from mechanical issues as a result."
