

BR + SL Porter Ltd Mount Maunganui

Bypass filtration snapshot

OIL FILTRATION

- 52 trucks specialising in vegetable oil, tallow, milk, molasses and wine transportation. Triple shifted during milk season.
- Previously changed oil every 20,000kms. Astrea filtration was installed and oil change intervals were increased to 60,000kms, but now standardised to 50,000kms due to variety of trucks involved.
- Internal workshop so all trucks are serviced by Porters.
- 8 years after Astrea oil bypass filtration fitted, no oil-related mechanical issues.

FUEL FILTRATION

Fuel filters were fitted as an insurance policy. In the past some trucks had injector issues but have not had any since installing fuel filters.

"Put simply, this is a great product to help save oil. With the Astrea filtration systems, we find we are not dumping and wasting good oil, so there are significant oil savings and cost reductions while also reducing the environmental impact of our operation.

We also find there is much less down time on the trucks and the time-saving on servicing has been noticeable. But more important to us is the relationship we have with Astrea – it's good to deal with a company that's so down-to earth and honest."
